

***The Telluride Education Foundation's mission is to expand and enrich experiential education opportunities for students and to motivate and recognize those who guide student learning. The Telluride Education Foundation creates partnerships with Telluride schools, local funding agencies and other community organizations established for educational purposes.***

### **Grant Application Form**

TEF reviews all grant applications and considers each one based on the Granting Criteria outlined on the backside of the application. TEF also awards grants based on the following, balancing factors:

- The relationship between the percentage of funds available to be disbursed and the numbers of students served by the grant. Our goal is to allocate funds by year end in equivalent amounts reflective of the total student population within each class and each school.
- The magnitude of the need of the students (or school) addressed by the grant request.
- The extent to which the proceeds of the grant will provide experiential learning opportunities for students.
- The perceived value, based on past student experiences as reported by teachers and principals of each school.
- The development of additional support within the community or classroom for education-related projects that have received funding in the past and have proven to be valuable.
- 

TEF urges applicants to submit their requests as early as possible during the year. Grant requests will be reviewed by TEF on the first Wednesday of each month during the school year. Each applicant should receive notification within 48 hours.
